<b>INTRODUCTION: Why Fractions, Decimals, and Percentages?</b>	<b>1</b>
Fractions Are a Critical Foundation in Mathematics	2
Evidence of Our Struggles (the Data from Research)	2
Why Do Students Struggle with Fractions, Decimals, and Percentages?	4
Mathematical Areas Linked to Students' Difficulties with Fractions	4
Procedural Knowledge Linked to Students' Difficulties with Fractions	7
Looking Ahead	9
Connecting the Chapter to Your Practice	10
<b>SECTION I: Understanding Number Talks</b>	<b>11</b>
CHAPTER 1: What Is a Number Talk?	13
• Classroom Clip 1.1	
$16 \times \frac{2}{8}$ : Why Number Talks?	14
Why Number Talks?	14

Understanding Number Talks: Four Foundational Principles	19
Establish a Safe Learning Community	20
🕒 Classroom Clip 1.2	
$4 \times \frac{1}{2}$ : Establishing a Safe Learning Community	22
Use Purposeful Problems	23
Record with Purpose	26
Know When to Ask and When to Tell	28
Number Talks and the Standards for Mathematical Practice	33
🕒 Classroom Clip 1.3	
Placing 0.89 on the Number Line: Number Talks and the Standards for Mathematical Practice	36
Looking Ahead	37
Connecting the Chapter to Your Practice	37
CHAPTER 2: How Do I Get Started with Number Talks?	38
Getting Started: Ten Essentials	39
Essential 1: Organize Your Classroom Space to Foster Student Engagement	40
Essential 2: Start with Problems That Give All Students Access and Elicit Thinking from Multiple Perspectives	41
Essential 3: Insist on Students Solving Problems Mentally	41
Essential 4: Provide Appropriate Wait Time	42
🕒 Classroom Clip 2.1	
Using Hand Signals and Wait Time	42
Essential 5: Accept, Respect, and Consider All Answers	43

Essential 6: Encourage Student Communication Throughout the Number Talk	44
● Classroom Clip 2.2	
$1\frac{1}{2} \times \frac{2}{5}$ : Using Turn and Talk with a Number Talk	45
Essential 7: Record Strategies to Make Student Thinking Public	49
Essential 8: Be Prepared When the Sharing of Strategies Doesn't Go as Anticipated	52
Essential 9: Limit Your Number Talks to Five to Fifteen Minutes	53
Essential 10: Be Patient with Yourself and Your Students	53
Five Ways to Collect Evidence of Students' Understanding	55
Ask Students to Indicate Which Strategies Are Most Efficient for Them	55
● Classroom Clip 2.3	
$\frac{1}{2} + \frac{7}{8}$ : Thinking About Efficient Strategies	56
Save Recordings of the Problems Posed and Corresponding Student Strategies	57
Hold Small-Group Number Talks Throughout the Week	57
Create and Post Student-Generated Strategy Charts	58
Give an Occasional Exit Problem at the End of the Number Talk	59
Looking Ahead	59
Connecting the Chapter to Your Practice	60

<b>SECTION II: Number Talks to Help Students Build Fractional Reasoning</b>	<b>61</b>
CHAPTER 3: What Are the Big Ideas with Rational Numbers?	63
Big Idea 1: Fractions Are Distinct Numbers	64
Big Idea 2: A Fraction Is Part of a Whole	66
Big Idea 3: The Denominator Is a Divisor and Tells How Many Equal Parts the Whole Is Divided Into	67
Big Idea 4: The Numerator Counts How Many Equal Parts There Are in the Fraction	68
Big Idea 5: There Is an Infinite Number of Fractions Between Any Two Given Fractions	68
Big Idea 6: Equivalence Means That a Fraction Can Be Repartitioned and Renamed in an Infinite Number of Ways	69
Looking Ahead	71
Connecting the Chapter to Your Practice	71
CHAPTER 4: Number Talks to Help Students Build Fractional Reasoning	72
Number Talks That Use Story Problems to Build Fractional Reasoning	73
▶ Classroom Clip 4.1	
What is $\frac{3}{4}$ of 12? Using a Story Context	74
Number Talks That Use Area Models to Build Fractional Reasoning	75
Category 1: Reasoning About Equal Parts of a Fraction	76
Category 2: Reasoning About Equivalence Among Fractions	82
▶ Classroom Clip 4.2	
The Fraction Kit: A Conversation About Equivalence	84

Number Talks That Use Set Models to Build Fractional Reasoning	89
Number Talks That Use Linear Models to Build Fractional Reasoning	93
Category 1: Using Integers as Benchmarks	94
Category 2: Using Integers and Fractions as Benchmarks	96
Number Talks That Use Comparing and Ordering to Build Fractional Reasoning	99
Category 1: Is the Fraction Closer to 0, $\frac{1}{2}$ , or 1 Whole?	100
Category 2: Is the Fraction Closer to 1, $1\frac{1}{2}$ , or 2 Wholes?	102
Number Talks That Use Strategies for Comparing and Ordering Fractions	104
Category 1: Using Proximity to $\frac{1}{2}$	106
🔍 Classroom Clip 4.3 Comparing $\frac{24}{50}$ and $\frac{21}{40}$	107
Category 2: Using Distance from the Whole	108
Category 3: Using Common Numerators	109
Category 4: Using Proportional Reasoning	110
Looking Ahead	111
Connecting the Chapter to Your Practice	111
CHAPTER 5: Number Talks to Help Students Connect Fractions, Decimals, and Percentages	113
The Importance of Focusing on Fractions Before Decimals and Percentages	114
Number Talks That Connect Fractions to Percentages	114
🔍 Classroom Clip 5.1 $\frac{1}{4} \times \frac{1}{3}$ : Connecting Fractions to Percentages	119

Category 1: Using Benchmark Fractions to Find Percentages	120
Category 2: Finding Percentages of Whole Numbers	122
Category 3: Comparing and Ordering Fractions and Percentages	124
Number Talks That Connect Fractions to Decimals	125
▶ Classroom Clip 5.2 Placing 0.9, 0.13, 0.255 on the Number Line: Connecting Fractions to Decimals	127
Category 1: Comparing and Ordering Fractions and Decimals	128
Category 2: Comparing Decimals to Decimals	129
Number Talks That Connect Fractions, Decimals, and Percentages	130
Looking Ahead	131
Connecting the Chapter to Your Practice	132

### **SECTION III: Number Talks to Help Students Operate with Fractions and Decimals** **133**

CHAPTER 6: Number Talks for Addition with Fractions	135
How Number Talks Help the Development of Addition Strategies with Fractions	136
Making Connections to Strategies for Adding Whole Numbers	137
▶ Classroom Clip 6.1 $\frac{1}{2} + \frac{5}{6}$ : Developing Addition Strategies with Fractions	138
Making Connections to the Arithmetic Properties	139

Using Story Problems	141
Using Models	142
Connecting Students' Strategies	146
Number Talks That Use Area Models for Addition with Fractions	147
▶ Classroom Clip 6.2	
Are the Addends Equal to 1? Using Area Models with Addition of Fractions	149
Category 1: Using Area Models Partitioned into Common Denominators	150
Category 2: Using Area Models Requiring Partitioning	153
Number Talks That Use Set Models for Addition with Fractions	157
Category 1: Using Set Models with Eight Dots	159
Category 2: Using Set Models with Twelve Dots	161
Number Talks That Use Linear Models for Addition with Fractions	163
Category 1: Using a Number Line Partitioned into Halves and Fourths	164
Category 2: Using a Number Line Partitioned into Halves and Thirds	166
Number Talks That Highlight the Addition Strategy "Decomposing to Make a Benchmark Number"	168
▶ Classroom Clip 6.3	
$\frac{1}{2} + \frac{1}{2}$ , $\frac{1}{2} + \frac{3}{4}$ : Developing Addition Strategies with Fractions	169
Category 1: Using Halves as Benchmarks	170
Category 2: Using Wholes as Benchmarks	172

Number Talks That Highlight the Addition Strategy “Adjusting an Addend”	174
Looking Ahead	177
Connecting the Chapter to Your Practice	178
CHAPTER 7: Number Talks for Subtraction with Fractions	179
How Number Talks Help the Development of Subtraction Strategies with Fractions	180
Making Connections to Strategies for Subtracting Whole Numbers	182
Using Story Problems	183
Using Models	184
Connecting Students’ Strategies	186
📺 Classroom Clip 7.1 $\frac{3}{4} - \frac{3}{8}$ : Developing Subtraction Strategies with Fractions	189
Number Talks That Use Area Models for Subtraction with Fractions	190
Using Area Models Partitioned into Eighths and Twelfths	192
Number Talks That Use Set Models for Subtraction with Fractions	195
Number Talks That Use Linear Models for Subtraction with Fractions	200
Category 1: Using a Number Line Partitioned into Halves and Fourths	201
Category 2: Using a Number Line Partitioned into Halves and Thirds	203
Number Talks That Highlight the Subtraction Strategy “Adding Up”	205

Category 1: Using Like Denominators	207
Category 2: Using Unlike Denominators	209
Number Talks That Highlight the Subtraction Strategy “Removing the Subtrahend in Parts”	211
Number Talks That Highlight the Subtraction Strategy “Partial Differences”	214
Looking Ahead	217
Connecting the Chapter to Your Practice	218
CHAPTER 8: Number Talks for Multiplication with Fractions	219
How Number Talks Help the Development of Multiplication Strategies with Fractions	220
Making Connections to Strategies for Multiplying Whole Numbers	221
Making Connections to Arithmetic Properties	224
Highlighting the Shifting Whole	225
🕒 Classroom Clip 8.1 $\frac{1}{4} \times \frac{1}{3}$ : Developing Multiplication Strategies with Fractions	227
Using Story Problems	227
Using Models	229
🕒 Classroom Clip 8.2 $\frac{1}{2}$ of 12, $\frac{1}{4}$ of 12: Developing Multiplication Strategies with Fractions	231
Connecting Students’ Strategies	232
Number Talks That Use Unit Fractions and Whole Numbers with Multiplication	236
Number Talks That Use Fractions and Whole Numbers with Multiplication	238

Number Talks That Use Models to Focus on the Shifting Whole	242
Number Talks That Use Unit Fractions with Multiplication	244
Number Talks That Highlight the Multiplication Strategy “Partial Products”	246
• Classroom Clip 8.3 $1\frac{1}{3} \times \frac{3}{4}$ : Developing Multiplication Strategies with Fractions	247
Category 1: Multiplying a Fraction by a Whole Number	248
Category 2: Multiplying a Mixed Number by a Fraction	250
Category 3: Multiplying a Fraction by a Fraction	252
Number Talks That Highlight the Multiplication Strategy “Switching Numerators or Denominators”	254
Number Talks That Highlight the Multiplication Strategy “Decomposing Factors into Factors”	258
Category 1: Multiplying a Fraction by a Whole Number	259
Category 2: Multiplying a Fraction by a Fraction	261
Number Talks That Highlight the Multiplication Strategy “Doubling and Halving”	263
• Classroom Clip 8.4 Doubling and Halving to Solve $\frac{1}{4} \times \frac{2}{3}$	265
Category 1: Multiplying Whole Numbers and Fractions	266
Category 2: Multiplying a Fraction by a Fraction	268
Looking Ahead	270
Connecting the Chapter to Your Practice	271

CHAPTER 9: Number Talks for Division with Fractions	273
How Number Talks Help the Development of Division Strategies with Fractions	274
Making Connections to Strategies for Dividing Whole Numbers	275
Highlighting the Shifting Whole	278
▶ Classroom Clip 9.1	
$1 \div \frac{3}{8}$ : Developing Division Strategies with Fractions	281
Using Story Problems	282
Using Models	284
Connecting Students' Strategies	287
Number Talks That Use Whole Numbers and Unit Fractions with Division	290
Category 1: Using Whole Number Divisors with Mixed Number Quotients	291
Category 2: Using Whole Number Divisors with Quotients Less Than 1	293
Category 3: Using a Unit Fraction as the Divisor	295
Number Talks That Highlight the Division Strategy "Proportional Reasoning"	297
▶ Classroom Clip 9.2	
$6 \div 3, 3 \div 1\frac{1}{2}, 1\frac{1}{2} \div \frac{3}{4}$ : Proportional Reasoning String	299
Number Talks That Highlight the Division Strategy "Common Denominators"	302
Category 1: Using the Same Divisors	303
Category 2: Using Equivalent Divisors	305
Number Talks That Highlight the Division Strategy "Partial Quotients"	307

Number Talks That Highlight the Division Strategy “Multiplying Up”	310
Looking Ahead	314
Connecting the Chapter to Your Practice	315
CHAPTER 10: Number Talks for Operating with Decimals	316
How Number Talks Help the Development of Computation Strategies with Decimals	318
Making Connections to Strategies for Computing with Whole Numbers	319
Making Connections to Arithmetic Properties	323
Using Story Problems	324
Using Models	325
Connecting Students’ Strategies	330
<i>Section 1: Number Talks for Addition with     Decimals</i>	333
Number Talks That Highlight a Place to Begin with Addition of Decimals	333
Number Talks That Highlight the Addition Strategy “Adding by Place Value”	336
Category 1: Adding Tenths and Hundredths	337
Category 2: Adding Hundredths and Thousandths	339
Number Talks That Highlight the Addition Strategy “Adding Up by Chunks”	341
Category 1: Adding Hundredths	342
Category 2: Adding Hundredths and Thousandths	344

Number Talks That Highlight the Addition Strategy “Making Benchmark Numbers”	346
Category 1: Adding Hundredths	347
Category 2: Adding Mixed Decimals	348
<i>Section 2: Number Talks for Subtraction with Decimals</i>	349
Number Talks That Highlight the Subtraction Strategy “Adding Up”	349
Category 1: Subtracting Hundredths	351
Category 2: Subtracting Multiple Place Values	353
Number Talks That Highlight the Subtraction Strategy “Adjusting the Minuend or Subtrahend”	354
Category 1: Adjusting the Subtrahend	356
Category 2: Adjusting the Minuend	357
Number Talks That Highlight the Subtraction Strategy “Constant Difference”	358
Category 1: Subtracting Hundredths	359
Category 2: Subtracting Mixed Decimals	361
Number Talks That Highlight the Subtraction Strategy “Subtracting by Place Value”	362
Category 1: Using Place Values	364
Category 2: Using Negative Numbers	366
<i>Section 3: Number Talks for Multiplication with Decimals</i>	368
Number Talks That Highlight a Place to Begin with Multiplication of Decimals	368
Category 1: Ten Times Smaller	369
Category 2: Ten Times Larger	371

Number Talks That Highlight the Multiplication Strategy “Partial Products”	373
Category 1: Using Whole Numbers and Decimals	375
Category 2: Using Mixed Decimals	377
Number Talks That Highlight the Multiplication Strategy “Breaking Factors into Factors”	379
Category 1: Using Tenths as a Multiplier	380
Category 2: Using Hundredths as a Multiplier	382
Number Talks That Highlight the Multiplication Strategy “Doubling and Halving”	384
Using Number Talk Strings	385
<i>Section 4: Number Talks for Division with Decimals</i>	387
Number Talks That Highlight the Division Strategy “Proportional Reasoning”	387
Category 1: Using Whole Numbers and Decimals	389
Category 2: Using Decimals	391
Number Talks That Highlight the Division Strategy “Multiplying Up”	393
Number Talks That Highlight the Division Strategy “Partial Quotients”	396
Looking Ahead	398
Connecting the Chapter to Your Practice	398
References	399
