Contents

ACKNOWLEDGMENTS	xiii
INTRODUCTION	xv
1 THE ROLE OF THE TEACHER	1
<i>Love of Reading</i>	2
<i>Active Learning</i>	3
<i>A Positive and Passionate Attitude</i>	3
<i>Differentiated Instruction</i>	4
<i>Examine how you feel about math.</i>	6
<i>Try out new strategies.</i>	6
<i>Make mistakes—publicly.</i>	7
<i>Really try to understand your students, and don't be surprised when you can't.</i>	7
<i>Find colleagues or mentors to learn with.</i>	8
<i>Above all, remember you are human in a human endeavor.</i>	8
2 DECODING, FLUENCY, AND VOCABULARY	10
Numerals and Letters: A Comparison	11
Decoding: From Reading to Math	12
<i>Decoding Reading</i>	15
<i>Decoding Mathematics</i>	17
Fluency: From Reading to Math	21
<i>Fluency and Reading</i>	22
<i>Fluency and Mathematics</i>	23

Vocabulary: From Reading to Math	24
<i>Vocabulary and Reading</i>	25
<i>Vocabulary and Mathematics</i>	26
The Whole Picture	28
3 TEACHING COMPREHENSION	29
Reading Comprehension: Understanding What Readers Do to Comprehend Texts	30
Teaching Math Comprehension Using Reading Comprehension Strategies	34
<i>Tapping Prior Knowledge (Making Connections) in Mathematics</i>	35
<i>Questioning in Mathematics</i>	38
<i>Inferring and Visualizing in Mathematics</i>	43
<i>Summarizing and Synthesizing in Mathematics</i>	47
<i>Monitoring and Repairing Understanding in Mathematics</i>	49
The Whole Picture	50
4 ORGANIZING THE CLASSROOM	52
Designing the Classroom Environment	55
<i>Fostering the Independent Use of Manipulatives</i>	56
<i>Creating a Math-Rich Learning Environment</i>	57
<i>Creating a Classroom That Helps All Students Succeed</i>	60
Scheduling and Pacing Lessons	61
Using Curriculum for Effective Planning: The Three “Knows”	64
Managing Mistakes and Encouraging Risk Taking	66
The Whole Picture	69
5 THE WORKSHOP MODEL	70
The Literacy Workshop	72
The Mathematics Workshop	74
<i>Minilessons or Other Whole-Group Lessons</i>	75
<i>Independent Work on Mathematics</i>	79
<i>Time to Explore and Practice How Numbers Work</i>	84
<i>Guided Small-Group Support or Strategy Lessons</i>	86
<i>Conferring</i>	88
<i>Group Work: Structures for Collaboration, Talk, and Choice</i>	88
<i>Math Shares (Reflection)</i>	92
The Whole Picture	95

6 ASSESSMENT	96
Parallels in How to Assess Literacy and Mathematics Learning	98
<i>Conferences (Individual Interviews)</i>	99
<i>Running Records</i>	104
<i>Retellings</i>	107
<i>Analysis of Student Work</i>	108
<i>Observation</i>	111
<i>Fact Mastery</i>	112
<i>Notebooks and Journals: Writing About Process</i>	115
<i>Self-Assessment</i>	116
Similarities in What to Assess in Literacy and Mathematics Learning	118
The Whole Picture	119
7 SUPPORTING STRUGGLING LEARNERS	121
Creating a Classroom Environment That Supports All Students	124
Approaches That Help Students Who Freeze Up at Math Time: Ellie's Story	125
Approaches That Help Students Who Find School Difficult: Artie's Story	129
Approaches That Help Students with Learning Disabilities: Marshall's Story	131
The Whole Picture	133
APPENDIX: FROM READING TO MATH TO YOUR CLASSROOM ..	135
